Liam Basingthwaighte

Thank you for your generous support in 2023.

With your help, we are transforming lives.

We thank you for a wonderful 2023

2023 was a very busy and fruitful year during which we accomplished a lot of firsts. We have been approved by UNICEF as a partner charity and are now able to purchase and ship UNICEF supplies. We started large scale projects: seniors 'Grandma', 'Mother/Baby', 'Mothers with Disabled Children'. We held our first annual pub night fundraiser. We've had our first students receive full scholarships to university and we have had our first sponsored adults start small businesses. The list goes on.

We have had many successes and have some areas where we are still working to reach our goals.

With your support we managed to help all the babies in our programs & are happy to say they are no longer malnourished. We have also added more people to each program.

A key 2024 goal is to raise funds for our first shipment of UNICEF multi-nutrient packets. **2024 GOAL**

PEACE
Love
JOY

LCAS made two work trips in 2023. The first in February and recently in November/December. Each trip we visited with all of our beneficiaries and were able to create and increase our community programs.

Our First Annual Fundraiser Pub Night – Great Success

Thank you, to all who attended and those who donated online. Great food, exciting contests (thanks Charlie), fun and lively conversation.

WE RAISED ABOUT \$14,000 FOR OUR PROGRAMS IN KENYA

TRANSFORMING LIVES WITH FOOD SHELTER AND EDUCATION

LovingCompassionAfrica.com to DONATE

Private Monthly Sponsorship

LCAS & local community leaders identify the most vulnerable in the community. Your monthly support has helped provide them with stability & hope. **Thank you.**

It has enabled Paul, Beatrice, Margret, Grace, Ruth & Florence to start small businesses. It also helped two single mothers (Eucabeth & Janet) grow their small hairdressing businesses. You are transforming lives.

SINGLE MOTHERS' HAIR SALONS

A Small Business

provides a family with hope, security, self esteem, purpose, food and additional funds. Additional funds help them become independent and self-reliant.

Community Support

We enjoyed visiting all our beneficiaries & were able to create and increase our community programs each visit. Additionally, we expanded our monthly private sponsorship program this year to include **twelve new families**, & increased the number of children we support with school fees, to over 100.

THANK YOU
for helping support so many and bringing them hope for the future.

Food

We provided \$30 - \$50 food packages to over 40 Nairobi families.

We celebrated early **Christmas** with Mass, singing & dancing and a feast for over **1000 people**.

BACKPACKS & School Supplies

We provided school supplies & sanitary pads (for girls) to our partner school & all the students we support. We also provided backpacks & Christmas presents to all those that are privately sponsored

The children were **thrilled with their school supplies and extremely grateful.**

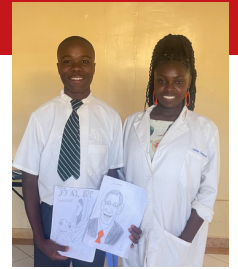

Some Success Stories

Meet Mary

LCAS provided science lab equipment, course textbooks & novels, supplies & teaching materials etc at our partner school St. Theresa High School.

We are proud to announce that 5 students received scholarships to university, including Mary, who received **full scholarship to a USA university for medicine.**

We provided a couple computers and St Theresa started a circuits club. They competed in a Nairobi school competition and **came 3rd, winning 4 more computers** for their school. As the first slum school to compete in these competitions, they drew attention from the government. They have been given a STEMs program.

to donate.

Follow us on Facebook

For \$30 - \$50/month provide a child with an education.

LCAS currently sends over 100 children to school, but we have a long list of children waiting for your help.

Goat Project - 2024

Mothers with Disabled Children cannot leave them alone to find work, but they can raise milk goats at their homes. Goat milk farming can be done on a small scale & will provide food, nutrients and needed funds to the families. This project will empower and enable them to purchase needed medicines, bring them hope, purpose and a way to become self sufficient.

We found one of the top 5 goat farmers in Kenya, who is only 3.5 km away' and he has agreed to train and oversee the project: building enclosure buying, raising, goat health, milking, selling etc Each pregnant goat will cost \$250.

If you are interested in helping this project, please donate on our web page. Write GOAT in the comment section.
